Background

The Via de Ventura Flood Mitigation Project is a result of a Master Drainage Study that was completed in January 2022.

Ponding from rainstorms and monsoon events occurs northeast of the Via de Ventura and Dobson intersection. There are currently two large box culverts that allow storm water flow to cross Via de Ventura directing storm water flow southwest towards storm drain inlets along Dobson Road. The existing natural washes are not efficient enough to handle the flows going through, therefore resulting in flooding across Dobson Road and resulting in excess water flows through Talking Stick Golf Course area.

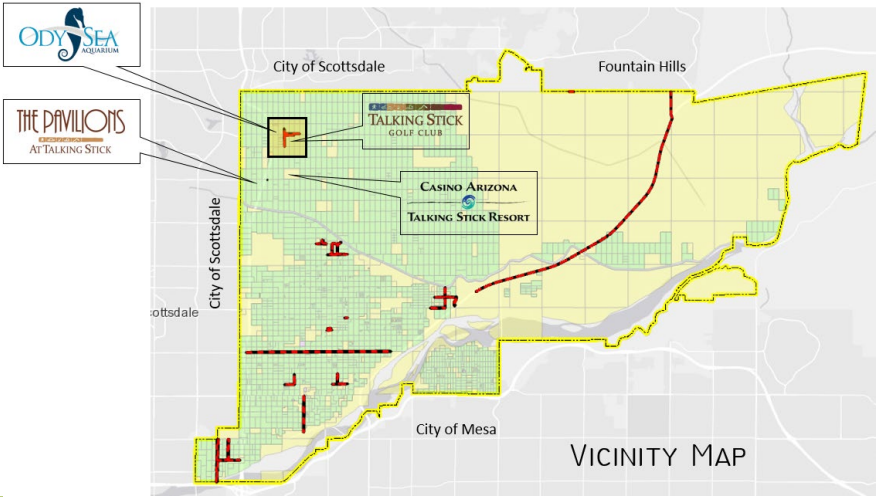

The proposed drainage project will construct an open channel adjacent to the north side of Via de Ventura and north along the east side of Dobson Road. The channel will capture and divert stormwater flow into the existing Dobson Road storm drain via new inlet locations.

A new drainage easement and two-year temporary construction easement are required for this project.

Project Details

Parcel Information:

- Four (4) allotments, no tribal tracts
- 86 landowners
 - 19 landowners are deceased not probated
 - Some landowners “own interest” in more than one of the four tracts

Other Encumbrances:

- SRPMIC Road & Utility Easement Dobson Rd.
- SRPMIC Road & Utility Easement Via De Ventura

Land Use (future) / Zoning (current):

- Area is zoned, Agricultural/Residential
- Land Use, Open Space

Appraisal:

- Appraisal No. H55-615-24-08
- Approved for use by the BIA – Appraisal and Valuation Services Office on 8/6/2024.

Staff will ask Superintendent to sign on behalf of deceased-not-probated and whereabouts unknown as allowed by the Federal Regulation.
