Sec. 16-215. Speeds to be reasonable and prudent.

(a) No person shall drive a vehicle on a highway or roadway at a speed greater than is reasonable and prudent under the circumstances, conditions and actual and potential hazards then existing. In every event, speed shall be so controlled as may be necessary to avoid colliding with any person, vehicle or other conveyance on or entering the highway in compliance with legal requirements and the duty of all persons to exercise reasonable care for the protection of others.

(b) Except as provided in subsections (c) and (d) of this section or where a special hazard requires a lesser speed, any speed in excess of these speeds shall be prima facie evidence that the speed is too great and therefore unreasonable and unlawful as follows:

(1) Fifteen miles per hour approaching school crossing.

(2) Twenty-five miles per hour in any residential area.

(3) Forty-five miles per hour in other locations.

(c) The maximum lawful speed as provided in this section shall be reduced to that which is reasonable and prudent under the conditions and having regard to the actual and potential hazards then existing, such as when:

(1) Approaching and crossing an intersection.

(2) Approaching and going around a curve.

(3) Approaching a hill crest.

(4) Traveling upon any narrow or winding roadway.

(5) Special hazards exist with respect to pedestrians or other traffic or by reason of weather or highway conditions.

(d) No person shall drive a motor vehicle at a speed that is less than that which is reasonable and prudent under existing conditions.

(e) The maximum speed limits set forth in this section may be altered as authorized in sections 16-218 and 16-219.

(f) The prima facie speed limits set forth in this section may be altered as authorized in section 16-218.

(g) The driver of every vehicle shall, consistent with the requirements of subsection (a) of this section, drive at an appropriate reduced speed when approaching and crossing an intersection, when approaching and going around a curve, when approaching a hill crest, when traveling upon any narrow or winding roadway, and when special hazards exist with respect to pedestrians or other traffic or by reason of weather or highway conditions.

(h) If the person exceeds the posted speed limit by more than 20 miles per hour, the violation is a criminal offense.

(i) No person shall drive a motor vehicle on a highway or roadway at a speed greater than is reasonable and prudent under the circumstances, conditions and actual and potential hazards then existing while in or adjacent to a work zone or construction zone.

- (1) Work zone or construction zone means that portion of a highway or roadway where construction, maintenance, or utility work is being performed, including the adjacent area used for traffic control, and extending from the first advance warning sign or traffic control device to the last sign or traffic control device indicating the end of the zone, whether or not workers are present at the time.
