SRPMIC SEEKS COMMUNITY FEEDBACK ON RECOMMENDED TRANSPORTATION SAFETY PROJECTS

Salt River Pima-Maricopa Indian Community invites residents to review proposed improvements and help shape transportation safety priorities

The Salt River Pima-Maricopa Indian Community (SRPMIC) is inviting community members to review and provide feedback on recommended transportation safety projects being considered as part of the Community's Tribal Transportation Safety Plan (TTSP).

SRPMIC is currently updating the TTSP, a long-term effort focused on reducing serious crashes and fatalities on local roadways. The plan aims to create a safer, more comfortable transportation network for everyone, including drivers, pedestrians, cyclists, and transit users.

What is the Tribal Transportation Safety Plan?

The TTSP provides a roadmap for improving safety throughout the Community by identifying key risks and focusing on practical solutions. As part of this update, the plan will:

- Evaluate past safety strategies to identify what is working and where improvements are needed
- Establish priority focus areas to address crash risks and safety concerns
- Recommend high-priority projects based on data and community input

Review the Recommended Projects

Previous community feedback helped identify transportation safety concerns and inform recommendations for future improvements. Now, SRPMIC is asking community members to review the recommended projects and share their feedback.

Community input will help SRPMIC understand which recommendations best reflect local transportation safety needs and priorities.

Share Your Feedback
